Summary

Highly motivated and results-oriented Data Engineer with expertise in designing, developing, and maintaining scalable data pipelines and data warehouses. Proven ability to leverage cloud technologies (AWS, Snowflake) and big data tools to deliver data-driven solutions. Seeking a challenging role where I can contribute to complex data challenges and leverage my technical skills to improve business intelligence.

Skills

- **Programming Languages:** Python (Expert), SQL (Expert), Scala (Intermediate)
- **Cloud Platforms:** AWS (EC2, S3, Lambda, Glue, Redshift), Snowflake
- **Data Tools:** Kafka, Spark, Airflow, Data Quality Tools
- **Databases:** Redshift, Teradata
- **DevOps:** Terraform, CI/CD
- **Data Governance:** Data Modeling, Schema Management

Work Experience

JPMorgan Chase

Lead Data Engineer February 2020 – January 2021

- Architected, implemented, and optimized ETL/ELT pipelines to ingest and process large datasets.
- Designed and managed enterprise cloud data warehouse solutions using Snowflake.
- Developed and maintained real-time data streaming applications with Kafka and Spark.
- Ensured data quality and governance across all data models.
- Collaborated with cross-functional teams to onboard new data sources and define schemas.

Bloomberg

Data Engineer August 2017 – January 2020

- Developed and maintained data pipelines for financial analysis.
- Utilized Spark for data processing and analysis.
- Contributed to data quality monitoring and improvement.
- Worked closely with data scientists to ensure data accuracy and completeness.

Projects

Real-Time Market Data Streamer

Description: Developed a real-time market data streamer using Apache Spark and Kafka. Tech Stack: Apache Spark, Kafka

- Implemented data ingestion and processing pipelines.
- Optimized data processing performance.
- Improved data accuracy and reliability.

Data Quality Monitor

Description: Created a data quality monitor using Spark. Tech Stack: Spark

- Automated data quality checks and validation.
- Identified and resolved data inconsistencies.
- Improved data quality metrics.

Certifications

- AWS Certified Data Analytics - Specialty
- Snowflake Certified Advanced Data Engineer

Education

Master of Science in Computer Engineering

New York University 2017

Bachelor of Science in Information Technology

Rutgers University 2015
