SUMMARY

Highly motivated and experienced Software Engineer with a Master's degree in Software Engineering and a strong foundation in backend development, data warehousing, and cloud technologies. Demonstrated expertise in designing, implementing, and maintaining scalable data pipelines and ETL/ELT processes. Possessing a passion for leveraging technology to solve complex business problems and contribute to innovative solutions. Seeking a challenging role where I can utilize my skills and experience to drive impactful results within a dynamic team.

WORK EXPERIENCE

Lockheed Martin | Software Engineer | June 2016 – December 2019

- Developed and maintained real-time data streaming applications using Kafka, Spark, and Redshift, ensuring data integrity and reliability.
- Contributed to the design and implementation of ETL/ELT pipelines to ingest and transform large datasets for business intelligence and reporting.
- Collaborated with data scientists and analysts to ensure data quality and consistency.
- Supported infrastructure maintenance and optimization to improve system performance.

Capital One | Principal Backend Engineer | January 2020 – December 2020

- Led the design and development of core backend systems using Java, Spring Boot, and Kafka for processing financial transactions.
- Optimized database performance through query tuning and schema redesign.
- Collaborated with team members on feature development and bug fixes.
- Ensured adherence to coding standards and best practices.

Education

Virginia Tech | Master of Science in Software Engineering | 2016

- Relevant Coursework: Distributed Systems, Data Structures and Algorithms, Database Management Systems

University of Maryland | Bachelor of Science in Electrical Engineering | 2014

- Relevant Coursework: Digital Signal Processing, Power Electronics, Control

SKILLS

- Java (Expert)
- Python
- C++
- SQL
- Apache Spark
- Airflow
- Snowflake
- Redshift
- Kafka
- Terraform
- ETL/ELT Pipelines

PROJECTS

Distributed Transaction System

- Developed a distributed transaction system using Java, Kafka, and SQL databases to facilitate complex business operations.
- Implemented fault tolerance mechanisms to ensure system availability and data integrity.
- Optimized data processing pipeline for enhanced performance.

Certifications

- Oracle Certified Professional, Java SE 11 Developer
- AWS Certified Solutions Architect - Associate

RELEVANT EXPERIENCE

Lockheed Martin

- Engineered Real-time Data Pipelines
- Improved data processing efficiency
- Collaborated with cross functional teams

Capital One

- Developed backend systems utilizing Java, Kafka and Redshift
-
