Summary

Highly accomplished and results-oriented Data Engineer with a Master's degree in Information Technology and extensive experience in designing, developing, and implementing data-driven solutions. Proven ability to leverage technologies like Python, Spark, Kafka, and AWS to build scalable and reliable data pipelines. Seeking a challenging role where I can apply my expertise to improve data quality, efficiency, and overall business intelligence.

Skills

- Python
- SQL
- Scala
- Apache Kafka
- Spark
- Hadoop
- Hive
- Azure Synapse Analytics
- AWS
- Terraform
- Data Governance
- Cloud Computing
- Data Warehousing

Work Experience

Lead Data Architect

Wells Fargo | July 2017 – Present

- Architected, implemented, and optimized ETL/ELT pipelines utilizing Python, Spark, and Kafka to support critical business processes.
- Designed and managed enterprise-level data warehouse solutions, ensuring data quality and integrity.

- Developed and maintained real-time data streaming applications, improving data accessibility and operational efficiency.
- Collaborated with cross-functional teams to onboard new data sources and define data schemas.
- Achieved a 15% reduction in data processing time through optimized pipeline design.

Data Engineer Intern

Wells Fargo | June 2016 – July 2017

- Assisted in the development and maintenance of data pipelines using SQL and Python.
- Developed and tested data quality checks to ensure data accuracy and consistency.
- Supported data migration projects, improving data transfer efficiency.

Education

Master of Science in Information Technology

University of Texas at Dallas | 2013 – 2015

- Focused on data management and data analysis techniques.
- Developed skills in data modeling, database design, and ETL processes.

Bachelor of Business Administration

Texas A&M University | 2011 – 2013

- Graduated with honors.

Projects

GDPR Compliance Data Flow

Description: Designed and implemented a data flow pipeline utilizing Apache Kafka and PySpark to ensure compliance with GDPR regulations. Implemented data validation and cleansing processes to maintain data quality. Tech Stack: PySpark, Apache Kafka

Data Lake Development

Description: Created a data lake using Spark and Hadoop to store structured and unstructured data from various sources. Implemented data governance policies to ensure data discoverability and usability. Tech Stack: Spark, Hadoop, Hive, AWS S3

Certifications

- Microsoft Certified: Azure Data Engineer Associate
- Certified Information Systems Security Professional (CISSP)
