SUMMARY

Highly motivated and results-oriented Senior Full-Stack Developer with a proven track record of designing, developing, and deploying scalable web applications. Expertise in front-end technologies, back-end development, and cloud platforms. Adept at leveraging AWS serverless services and Agile methodologies to deliver high-quality solutions. Seeking a challenging role where I can contribute to innovative projects and continue to expand my skills in a dynamic environment.

WORK EXPERIENCE

Dell Technologies

Senior Full-Stack Developer March 2021 – Present

- Architected and developed a new customer portal utilizing React, TypeScript, and Node.js microservices, handling 10,000+ active users.
- Implemented a serverless backend leveraging AWS Lambda, API Gateway, and DynamoDB, resulting in a 40% reduction in hosting costs.
- Contributed to a secure and scalable system architecture.

RetailMeNot

Full-Stack Developer June 2018 – February 2021

- Developed features across the stack using React, Redux, and Express.js, contributing to a 20% increase in conversion rates.
- Worked on a large-scale project that required strong communication and collaboration among a team of developers.

SKILLS

- **JavaScript/TypeScript (Expert)**
- **Python**
- **SQL**
- **React**
- **Redux**

- Next.js
- HTML5
- CSS3
- Webpack
- Node.js
- Express.js
- Python (Django)
- REST
- GraphQL
- AWS (Lambda, DynamoDB, API Gateway, S3)
- Docker
- Kubernetes
- Git
- CI/CD tools

EDUCATION

The University of Texas at Austin

Bachelor of Science in Computer Science 2018 – 2018

PROJECTS

Serverless E-commerce Platform

- Developed a fully functional e-commerce platform using React, TypeScript, and Node.js microservices.
- Implemented a responsive and user-friendly interface for product browsing, searching, and purchasing.
- Utilized AWS Lambda and API Gateway for backend processing and DynamoDB for data storage.

Real-Time Chat Application

- Designed and implemented a real-time chat application using Node.js, WebSockets, and MongoDB.
- Implemented features like user authentication, message delivery, and real-time updates.
