PROFESSIONAL SUMMARY

Machine Learning Engineer with 4 years of experience specializing in high-performance predictive modeling and data ingestion. Proficient in PyTorch, Spark, and deploying models on GCP. Combines strong data engineering skills with a deep understanding of ML lifecycle management.

EDUCATION

Master of Science in Machine Learning

Carnegie Mellon University, 2019

Bachelor of Technology in Computer Science

IIT Bombay, 2017

CERTIFICATIONS

- Google Professional Cloud Architect
- Databricks Certified Associate Developer for Apache Spark

WORK EXPERIENCE

ML Engineer | Google | June 2021 - Present

- Developed and productionized computer vision models using PyTorch on Google Cloud Platform, improving object detection accuracy by 8%.

- Designed and maintained ETL pipelines using Java and Apache Beam for large-scale data pre-processing on GCP Dataflow.
- Managed data versioning and model tracking using MLflow and Kubeflow, streamlining deployment timelines.
- Collaborated with Data Scientists to refactor prototype models into robust, scalable microservices.

Data Analyst/Engineer | Amazon | August 2019 - May 2021

- Optimized complex SQL queries and Redshift data models, reducing query execution time by 50% for business analysts.
- Built batch processing jobs using Apache Spark (PySpark) to analyze customer behavior data and feed recommendation engines.

TECHNICAL SKILLS

Programming Languages: Python (Expert), SQL, Java (Intermediate)

ML Frameworks: PyTorch, TensorFlow, Scikit-learn, XGBoost

Big Data: Apache Spark, Hadoop, Apache Beam

Cloud Platforms: GCP (AI Platform, BigQuery, Dataflow), AWS

Tools: Kubeflow, MLflow, Airflow, Git, Docker

PROJECTS

Text Classification NLP Model

- Fine-tuned a BERT model for domain-specific text classification using PyTorch.
- Achieved F1 score of 0.91 on custom legal document corpus.
