SUMMARY

Highly motivated and skilled Machine Learning Engineer with a Master's degree in Computer Science and extensive experience in developing and deploying machine learning models for various applications. Proven ability to translate business requirements into effective machine learning solutions, leveraging deep learning techniques and cloud infrastructure. Seeking a challenging role where I can contribute to innovative projects and continue to expand my expertise in AI and data science.

WORK EXPERIENCE

Google, Mountain View, CA – Machine Learning Engineer | June 2021 – Present

- Developed and produced computer vision models utilizing PyTorch and TensorFlow, achieving a 8% improvement in object detection accuracy across Google Cloud Platform.
- Designed and maintained ETL pipelines for large-scale data preprocessing using Java and Apache Beam, streamlining data ingestion and preparation.
- Optimized SQL queries and Redshift data models, resulting in a 50% reduction in query execution time for business analysts.

Amazon, Seattle, WA – Data Analyst/Engineer | August 2019 – May 2021

- Analyzed customer behavior data using Spark (PySpark) to build batch processing jobs for recommendation engines.
- Built machine learning models for behavioral prediction, improving recommendation engine effectiveness.
- Contributed to the creation of feature engineering workflows to improve the performance of data analysis.

SKILLS

- Python
- SQL
- Java

- TensorFlow
- PyTorch
- Scikit-learn
- Spark (ML)
- Airflow
- AWS
- GCP
- Jupyter

EDUCATION

Carnegie Mellon University, Pittsburgh, PA – Master of Science in Machine Learning | 2019

- GPA: 3.9/4.0

IIT Bombay, Mumbai, India – Bachelor of Technology in Computer Science | 2017

- GPA: 3.8/4.0

PROJECTS

Text Classification NLP Model | GitHub | Fully trained a BERT model for text classification, using PyTorch, and achieved an F1 score of 0.91 on a custom legal document corpus.

CERTIFICATIONS

- Google Professional Cloud Architect (Ongoing)
- Databricks Certified Associate Developer for Apache Spark (Completed 2022)
