PROFESSIONAL SUMMARY

Senior Data Scientist with 6+ years of experience in deep learning, predictive modeling, and scalable MLOps. Expert in designing and deploying high-impact recommendation systems. Proven track record of leveraging Python and cloud infrastructure to deliver measurable business results.

EDUCATION

Master of Science in Data Science

Stanford University, 2018

Bachelor of Science in Computer Science

UC Berkeley, 2016

CERTIFICATIONS

- AWS Certified Machine Learning - Specialty
- Google Professional Data Engineer

WORK EXPERIENCE

Senior Data Scientist | Meta | January 2021 - Present

- Built and deployed large-scale predictive models using TensorFlow and PyTorch, improving user retention by 15%.

- Led MLOps initiative, implementing CI/CD pipelines via Airflow and Kubernetes for model serving and monitoring.
- Designed recommendation engine using deep collaborative filtering techniques, boosting conversion rate by 9%.
- Conducted complex A/B testing and hypothesis validation for all new product features, guiding \$5M in development.

Data Scientist | Uber | June 2018 - December 2020

- Optimized dynamic pricing algorithms using Scikit-learn and Spark, leading to a 12% reduction in customer churn.
- Analyzed and modeled complex rider behavior patterns using advanced SQL and Python for business insights.
- Created interactive dashboards in Tableau to track key performance indicators for executive review.

TECHNICAL SKILLS

Programming Languages: Python (Expert), R, SQL

ML Frameworks: TensorFlow, PyTorch, Scikit-learn, XGBoost

Big Data: Apache Spark, Hadoop, Hive

Cloud Platforms: AWS (SageMaker, S3, EC2), GCP

Tools: Airflow, Jupyter, Git, Docker, Kubernetes

Statistical Methods: A/B Testing, Hypothesis Testing, Causal Inference

PROJECTS

Personalized Recommendation API

- Developed a scalable REST API using Flask to serve real-time recommendations based on user history.
- Utilized PyTorch for deep learning inference, achieving 200ms latency.

Time-Series Forecasting Model

- Built an LSTM model for forecasting sales, achieving 94% accuracy over a 3-month horizon.
- Built an LSTM model for forecasting sales, achieving 94% accuracy over a 3-month horizon.
