Sarah Chen Contact Info sarah.chen@innovate.com San Francisco, CA

SUMMARY

Highly motivated and accomplished Data Scientist with a Master's degree in Data Science and extensive experience in developing and deploying machine learning solutions for complex business challenges. Proven ability to translate business requirements into data-driven insights, build and maintain scalable data pipelines, and deliver impactful results. Seeking a challenging role where I can leverage my technical expertise and analytical skills to drive innovation and contribute to a data-centric organization.

WORK EXPERIENCE

Meta, San Francisco, CA Senior Data Scientist | January 2021 – December 2020

- Led the development and implementation of machine learning models for recommendation systems, resulting in a 15% increase in user engagement.
- Developed and maintained A/B testing frameworks using Python and Scikit-learn to optimize product features.
- Collaborated with engineering teams to deploy models to production environments utilizing Airflow and Spark for ML workflows.
- Contributed to improved data quality through data pipeline design and implementation.
- Mentored junior data scientists, fostering knowledge sharing within the team.

Uber, San Francisco, CA Data Scientist | June 2018 – December 2020

- Designed and implemented a time-series forecasting model using LSTM, improving prediction accuracy by 10%.
- Analyzed large datasets using SQL and Python to identify trends and patterns, informing product strategy.
- Participated in A/B testing experiments to evaluate new feature implementations and user behaviors.
- Developed and maintained data pipelines using Spark and Hadoop for efficient data processing.
- Worked with a team to improve data quality and accessibility.

SKILLS

- Python (Expert)
- R
- SQL
- TensorFlow
- PyTorch
- Scikit-learn
- XGBoost
- Apache Spark
- Hadoop
- Hive
- AWS SageMaker, S3, EC2
- GCP
- Airflow
- Jupyter
- Git
- Docker
- Kubernetes
- A/B Testing, Hypothesis Testing, Experimental Design

EDUCATION

Stanford University, Stanford, CA Master of Science in Data Science | 2018

- GPA: 3.9/4.0

UC Berkeley, Berkeley, CA Bachelor of Science in Computer Science | 2016

- GPA: 3.8/4.0

PROJECTS

Personalized Recommendation API

- Developed a personalized recommendation system using Flask and PyTorch for a social media platform.
- Implemented features for collaborative filtering and content-based filtering.
- Utilized techniques to enhance model accuracy and scalability.

Time-Series Forecasting Model

- Created a time-series forecasting model using LSTM and TensorFlow to predict stock prices.

- Evaluated model performance using metrics like RMSE and MAE.
- Implemented robust error handling and data validation procedures.

CERTIFICATIONS

- AWS Certified Machine Learning - Specialty
- Google Professional Data Engineer
